

H3CR-F Twin Timer

Repeat Cycle Timers (1-877-347-4788)

Here is a timer that can "do it all," yet is easy to set. It is a repeat cycle timer that will turn on and off at pre-set intervals (not time of day). Extremely useful for automatic operation of valves, feeding devices, pumps, etc. It allows the setting of timing ranges from .05 seconds to 100 hours! Set on and off periods independently with two dials, ± 1 percent accuracy. 1-3/4" square with 8-wire quick plug. Its double pole, double throw switch is rated at 5 amps, 250VAC. Input voltage 100-240VAC, 50/60 Hz. Made in Japan.

T5	Repeat Cycle Timer	\$98.70 (\$90.93/4+)
